RESEARCH GEOENGINEERING

GeoEngineering is the intentional manipulation of Earth's weather and climate.

Per vast documentation in federal budgets and beyond, GeoEngineering has been ongoing for a century - in earnest over the past two decades. However, We-the-People never gave our informed consent! Such hazardous activities are an affront to our inherent rights, impairing health and cutting life short for every one of us, even Life on Earth. Please support this effort to protect health, environment, and the people of The United States of America.

The Protection of USA's Environment and Public Health and Safety must become the highest priority, not an afterthought. We can do this with a federal HAZARDOUS EMISSIONS ACT .

Whether you're a Democrat, Republican, Green, Libertarian, Independent, Progressive or other, you deserve a clean atmosphere with natural Schumann Resonances, fresh air, pure water, clean soil to grow your food, natural electro-magnetism for birds and bees; and good opportunities for a healthy, happy, and prosperous life.

When GeoEngineering agents and activities and microwave radiation from infrastructures subject our Earth to highly unnatural hazards, we can't achieve our potential or maintain our health. Animals and plants wither and die.

STOP BEING USED LIKE A LAB RAT

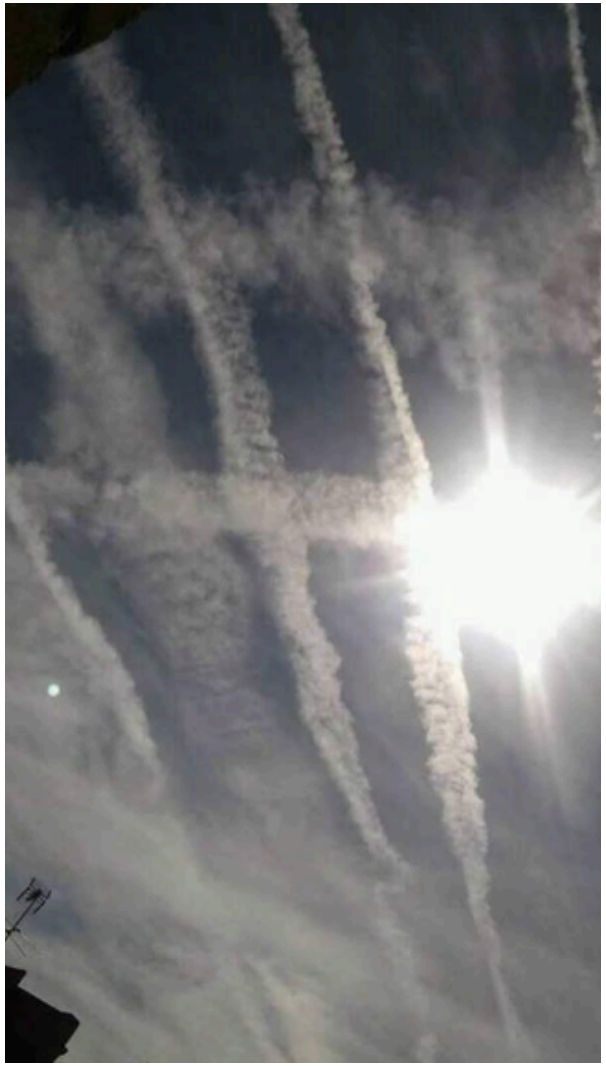
ZERO GEOENGINEERING.COM

BECAUSE DELIBERATE HUMAN INTERVENTION IN THE EARTH'S WEATHER AND CLIMATE SYSTEMS IS A WAR ON NATURE.

Americans4ZeroGeoEngineering.com

#A4ZG

CURRENT WEATHER is being MANIPULATED by 14 DIFFERENT TECHNIQUES, none of which is regulated.



FACT: Solid dry ice – CO2 – is intentionally released via aircraft for "cloud-seeding". If CO2 is harmful, why is it being released in huge amounts all over the Earth?

PRIMARY FOCUS

#1

To provide rigorous civilian oversight, leadership, and correction of the currently unregulated U.S. military and corporate programs degrading human health and the environment, in the U.S. and internationally.

#2

The introduction and swift passage of a federal

HAZARDOUS EMISSIONS ACT

implementing a national process and procedure to prohibit such emissions and penalize polluters, including, without limitation, those engaged in large-scale environmental manipulations through GeoEngineering (GE), Weather Modification (WM), and Cloud Seeding (CS) operations, in their release of harmful substances and physical agents.

#3

For the quick reduction and ultimate elimination of hazardous emissions.

WHY DOES CHINA HAVE A WEATHER MODIFICATION OFFICE THAT EMPLOYS 30,000 PEOPLE?

China is attempting to create a freshwater supply by producing man-made rain over a landmass 3 TIMES THE SIZE OF SPAIN.

Does the US know about this?

Of course. The US invented it.
